

15.6 HIGH BRIGHTNESS 15.6" High Brightness Display

15.6" G156HAN04.0 High Brightness Display

Resolution : 1920 x 1080 (FHD)

Outline Dimension(WxHxD) : 363.8(W)x215.9(H)x10.32(D)

Active area(HxV) : 344.16(H) x 193.59(V)

Brightness (cd/m²) : 1,000

LED Life Time(Hrs) : 50,000

Viewing Angle : 89/89/89/89

LED B/L Driver : Built-in

Interface : LVDS

Temperature Range :

Operating(°C) : -30~85

Storage(°C) : -30~85

Specifications

Wide View Angle

Ultra Hight Brightness

Lamp > 50K Hours

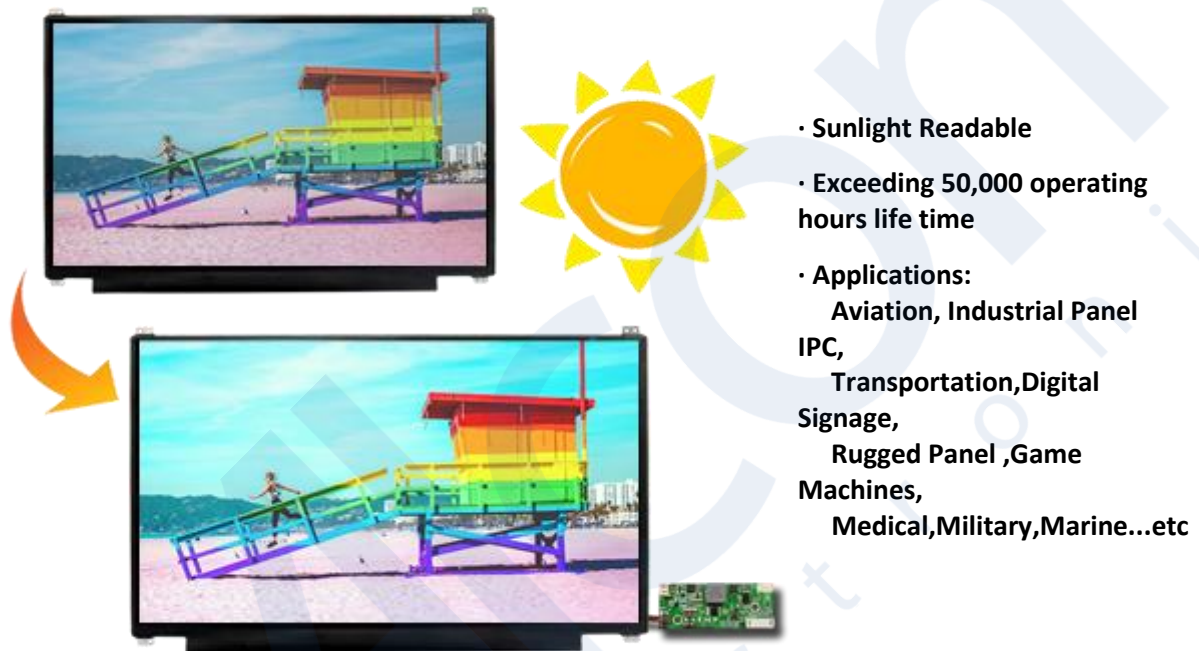

Full HD

High brightness displays differ from the brightness of traditional panels.

It allows the user to see the display under strong sunlight or under direct light source which enables operation under special conditions in industries such as military operation, transportation industries, outdoor digital signage, and medical sectors.

*We provide customization services for touch panel integration and optical bonding.

Features

G156HAN04.0 General Description
