

## Education

### Enriching Interaction Between Teacher and Student

Large interactive displays, combined with electronic schoolbags and smart class displays, can present rich multimedia materials and real-time information. These make learning more exciting and improve students' interest and efficiency. Integrating smart devices through smart display creates a smart and more convenient classroom.

## Entertainment

### Striking Designs for Immersive Visual Experience

Custom tailor-made curved displays, TARTAN stretched, round displays, and various uniquely-shaped displays with integrated touch panels make the design and appearance of gaming machines, slot machines, pachinko machines, and arcade games more flexible. The vivid colors and high-resolution displays attract players to stop and play.

## Medical and Healthcare Professional Medical Displays Improving Precision Medicine

AUO Display Plus medical-grade displays provide clear and accurate high-definition images to help doctors provide more accurate diagnosis and treatment. Medical applications include ultrasound, imaging, endoscopy, surgery, diagnosis, and physiological monitors. We also offer high-quality X-ray sensors for medical imaging such as chest, breast, and dental inspection.

## Industrial Stability and Reliability in Harsh Environments

AUO Display Plus displays provide superior stability, reliability, and display performance, for a range of harsh environments. They meet the requirements for safe and durable use for the HMI of industrial computers, security monitoring systems, and touch control panels.

### Corporate Improving Brand Image and Work Efficiency

Whether digital signage, a video wall, or an interactive touch display, diversified applications allow companies to provide more effective publicity, sales, and services in the office lobby, reception area, or meeting room to communicate more efficiently with customers.

### Outdoor Grabbing Customer Attention with Creativity

Outdoor displays attract more attention than traditional posters and provide a range of content that can be updated in real-time. AUO Display Plus high-brightness displays bring higher visibility for digital drive-thru menus, Digital Out Of Home (DOOH), bus shelter advertising, and window displays, while ensuring efficient and stable performance.

## Retail

### Creating a Customer Centered Experience

Various displays specially developed for digital signage, smart shelves, digital menu boards and POS systems can perfectly present dynamic advertisements and product information, attract consumers' attention. Whether in chain stores, large shopping malls, supermarkets, or catering outlets, our displays can provide excellent visual effects and leverage precision marketing tools.

## Transportation

### Adding New Dimensions to the Passenger's Journey

For public transportation such as stations, airports, carriages and cabins, AUO Display Plus offers a range of products including TARTAN stretched displays, high-brightness outdoor displays, touch panels and extremely narrow border video walls, so that confined spaces can be utilized to provide passengers with real-time schedules, travel information, and advertising messages.
