

Entertainment Display

Forging an All New Level of Immersion

Distinctive Design to Provide Players with Immersive Entertainment

AUO Display Plus offers professional-grade display panels with special specifications that incorporate bright colors, free form cutting and low-noise performance. The exquisite picture quality and variety of display formats provide players with a novel visual experience. For pachinko and pachin-slot machines, AUO Display Plus developed curved displays with punch-hole technology. The panel curvature and partially transparent displays can be tailored to different machine designs and roller mechanisms. These customized solutions deliver both entertainment and compliance with safety regulations.

High Brightness and High Colors for Perfect Game Pictures

Crystal-clear picture quality with high brightness and high color saturation deliver the optimal visual effect.

High-brightness design improves display visibility under all kinds of indoor lighting conditions.

High-quality performance is guaranteed to deliver stable operation over extended periods of time.

High Brightness

High Reliability

Custom Curved Display for Immersive Experience

Curve types and curvatures can be optimized to satisfy the viewing angle or usage scenarios of different entertainment products.

Optimization of panel design and thinner glass help maintain the display uniformity and improve product reliability.

High Brightness

Curved

Exclusive Punch-hole Technology with Custom Partially Transparent Display

The exclusive punch-hole technology can create all kinds of partially see-through display for the roller mechanisms of special game machines.

The customized design can satisfy the machine's requirements for novel outlook while complying with legal safety measures.

High Brightness

Dedicated Touch Display for Fitness Equipment

The waterproof, anti-vibration and high-sensitivity multi-touch displays provide users with a more convenient interface while exercising.

High resolution and highly saturated picture quality means that fitness machines can now double as multimedia entertainment.
