

SEALSQ DEVICE ATTESTATION FOR MATTER

Delivering the trust hierarchy and device attestation certificates (DACs) for Matter connected devices

As an approved Product Attestation Authority (PAA), Wisekey empowers its subsidiary SEALSQ to provide CSA members with the Product Attestation Intermediate (PAI) and Device Attestation Certificates (DACs) required to be Matter compliant.

Security

Reliability

Interoperability

Simplicity

Matter Device Attestation

SEALSQ solutions for Matter device attestation include:

- A Product Attestation Intermediate issued and managed by Wisekey, chaining up to Wisekey's approved and trusted root for Matter
- Device Attestation Certificate issuance with SEALSQ INeS CMS, with flexible features such as batch enrollment, manufacturing-centric workflows, and highly scalable issuance

Improve Time to Market Reduce Operating Costs

Our market-ready chain of trust enables members to achieve Matter compliance in an expedient and cost effective way, while benefiting from Wisekey's global expertise in managing trust hierarchies and its feature-rich, flexible solutions for certificate issuance.

Get market-ready trust services

A Product Attestation Intermediate issued, chaining up to Wisekey's approved and trusted root for Matter.

Simplify certificate issuance

Device Attestation Certificate issuance with INeS, with flexible features such as batch enrollment, manufacturing-centric workflows.

Adopt a streamlined PKI

INeS IoT platform is hosted in secure datacenters with Webtrust accreditations. Focus on your business and use the PKI as a service.

Automate enrolment with your application

RESTful APIs and EST enrolment are available for automating the certificate enrolment process and managing the life-cycle.

Get global support in NORAM, APAC, EMEA

Local teams in Japan, Taiwan, US and EMEA to support your different locations.

Simplify your supply chain

On-chip or cloud-based provisioning services with the Matter Root-of-Trust.

How to get test DAC
