

## Tantalum Capacitors

Hongda Capacitors is the number one tantalum capacitor supplier with five advanced tantalum capacitors production lines in China, which provides flexibility and capacity for the demanding electronic industry. We supply general purpose tantalum capacitors, automotive grade tantalum capacitors, high temperature tantalum capacitors, THC tantalum capacitors, Polymer tantalum capacitors, Liquid tantalum capacitors, high energy tantalum capacitors.

## Chip Ceramic Capacitors

Driven by the infinite desire for electronic devices to be more compact and reliable, MLCCs have become one of the most developed and highly competitive capacitors segments in the market.

## SMD Electrolytic Capacitors

With more than 20 years of designing, manufacturing and supplying capacitors, we have developed ourselves to be the leading global supplier in the capacitors market. Hongda Capacitors continuously focus on providing good quality and environmental friendly products and services to meet customer's total satisfaction.

## Polymer Electrolytic Capacitors

Chip Type Conductive Polymer Aluminum Solid Electrolytic Capacitors are featured with low ESR and high ripple current. HongDa Chip Type Conductive Polymer Aluminum Solid Electrolytic Capacitors are widely used on LCD-TV, Automotive, Play Station (Game Machines), GPS, and Base Station(BS).

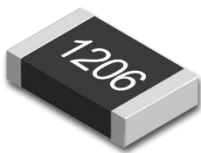

## Radial Electrolytic Capacitors

Hongda Capacitors is a China capacitors manufacturer, we are your China capacitors supplier. We are a ISO9001:2015 and IATF16949 certified factory, obtained GJB9001C:2017 military qualification from the Ministry of Defense. We produce various series, including standard, high temperature, low impedance, low leakage, long life, ultra-low ESR, ultra-low temperature, Snap-in Radial Aluminum Electrolytic Capacitors etc. By improving material technology, We have been able to increase life time by up to 100% to 10,000 hours at 105°C, over previous generation products and also improve capacitance by up to 30%.

## Chip inductors and Beads

Inductors and beads are common passive electronic components, which are widely used in many challenging applications. We produce high reliability, Excellent solderability and heat resistance chip inductors and beads. Multiple sizes are available, such as 0201, 0402, 0603, 0805, 1206 and so on.

## SMD Resistors

Hongda Capacitors offers a wide range of Thick Film Chip Resistors, such as 01005, 0201 0402 0603 0805 1206 1210 1812 2010 2512. Surface mount resistors, SMD resistors use surface mount technology, SMT to provide considerable advantages in terms of space saving and automated manufacture of printed circuit boards.
