

FEATURES

- ▶ Industrial Standard Quarter Brick Package
- ▶ Ultra-wide Input Range 36-160VDC
- ▶ I/O Isolation 2000VAC with Reinforced Insulation
- ▶ Excellent Efficiency up to 90%
- ▶ Operating Baseplate Temp. Range -40°C to +105°C
- ▶ No Min. Load Requirement
- ▶ Under-voltage, Overload/Voltage/Temp. and Short Circuit Protection
- ▶ Remote On/Off Control, Output Voltage Trim, Output Sense
- ▶ Vibration and Shock/Bump Test EN 61373 Approved
- ▶ Cooling, Dry & Damp Heat Test IEC/EN 60068-2-1, 2, 30 Approved
- ▶ Railway EMC Standard EN 50121-3-2 Approved
- ▶ Railway Certified EN 50155 (IEC60571) Approved
- ▶ Fire Protection Test EN 45545-2 Approved
- ▶ UL/cUL/IEC/EN 62368-1 Safety Approval & CE Marking

NEW

PRODUCT OVERVIEW

The MINMAX MRZI150 series is a new generation of high performance 150W DC-DC converters in quarter brick package designed specifically for railway applications with popular 36-160 VDC input ranges. MRZI150 is approved by railway industry standard EN 50155 and complies with EMC standard EN 50121-3-2.

Advanced circuit topology provides a very high efficiency up to 90% which allows baseplate temperature up to 105°C and very high I/O isolation up to 2000VAC with reinforced insulation which are designed to meet stringent requirements and harsh environment.

Further product features include under-voltage, overload/voltage/temp., short circuit protection, remote On/Off Control(positive/negative logic), output voltage trim, output sense and complies specifically fire protection test meets EN45545-2 to ensure safety during railway/railroad vehicle operation.

Model Selection Guide

Model Number	Input Voltage (Range) ⁽⁹⁾ VDC	Output Voltage VDC	Output Power W	Output Current Max. A	Input Current		Over Voltage Protection VDC	Max. capacitive Load μ F	Efficiency (typ.)
					@Max. Load	@No Load			@Max. Load
					mA(typ.)	mA(typ.)			%
MRZI150-110S05	110 (36 ~ 160)	5	135	27	1364	10	6.2	51000	90
MRZI150-110S12		12	150	12.5	1515	10	15	8850	90
MRZI150-110S15		15	150	10	1532	10	18	5700	89
MRZI150-110S24		24	150	6.25	1550	10	30	2200	88

Power Derating Curve

Notes

- 1 Specifications typical at Ta=+25°C, resistive load, nominal input voltage and rated output current unless otherwise noted.
- 2 Transient recovery time is measured to within 1% error band for a step change in output load of 75% to 100%.
- 3 Other input and output voltage may be available, please contact MINMAX.
- 4 **It is necessary to parallel a capacitor across the input pins under normal operation. Minimum Capacitance: 150μF/ 250V KXJ.**
- 5 The external components might be required to meet EMI/EMS standard for some of test items. Please contact MINMAX for the solution in detail.
- 6 **The hot-swap operation is extremely prohibited.**
- 7 Over Current Protection (OCP) is built in and works over 130% of the rated current or higher. However, use in an over current situation over 4 seconds must be avoided whenever possible.
- 8 Do not exceed maximum power specification when adjusting output voltage. Please see the External Output Trimming table at page 6.
- 9 ***Input Voltage Vin= 36VDC/1s for Start-up Operation and Vin= 40VDC for Continuous Operation.**
- 10 Specifications are subject to change without notice.

Package Specifications
Mechanical Dimensions

Pin Connections

Pin	Function	Diameter mm (inches)
1	+Vin	Ø 1.0 [0.04]
2	Remote On/Off	Ø 1.0 [0.04]
3	-Vin	Ø 1.0 [0.04]
4	-Vout	Ø 2.0 [0.08]
5	* -Sense	Ø 1.0 [0.04]
6	Trim	Ø 1.0 [0.04]
7	* +Sense	Ø 1.0 [0.04]
8	+Vout	Ø 2.0 [0.08]

* If remote sense not used the +sense should be connected to +output and -sense should be connected to -output
Maximum output deviation is 10% inclusive of trim

- ▶ All dimensions in mm (inches)
- ▶ Tolerance: X.X±0.5 (X.XX±0.02)
X.XX±0.25 (X.XXX±0.01)
- ▶ Pin diameter tolerance: X.X±0.05 (X.XX±0.002)

Physical Characteristics

Case Size	: 58.4x37.3x17.0 mm (2.30x1.47x0.67 inches)
Case Material	: Plastic resin (flammability to UL 94V-0 rated)
Top Side Base Material	: Aluminum Plate
Pin Material	: Copper
Potting Material	: Silicone (UL94-V0)
Weight	: 110g

Heatsink (Option –HS7)

Physical Characteristics

Heatsink Material	: Aluminum
Finish	: Black Anodized Coating
Weight	: 63g

*For more power derating information, please refer to E.C Note.

PCB Installation of End Users

1. Please evaluate mechanical stress (vibration, shock, bump) during field applications.
2. It has to equip with installation kit if excess the guaranteed specifications, please contact MINMAX for detail information.
3. Applied torque per screw 9 kgf.cm min.

External Output Trimming

Output can be externally trimmed by using the method shown below

Trim Range (%)	MRZI150-110S05		MRZI150-110S12		MRZI150-110S15		MRZI150-110S24		MRZI150-110S54	
	Trim down (kΩ)	Trim up (kΩ)	Trim down (kΩ)	Trim up (kΩ)	Trim down (kΩ)	Trim up (kΩ)	Trim down (kΩ)	Trim up (kΩ)	Trim down (kΩ)	Trim up (kΩ)

Order Code For Heatsink kit (including: Heatsink x1, Screw (M3/14mm) x 2, Thermal Pad x1)

HS-QB004

Test Setup

Peak-to-Peak Output Noise Measurement Test

Use a 22 μ F polymer capacitor for 5V, 12V, 15V output models and a 33 μ F polymer capacitor for 24V output model and a 1 μ F ceramic capacitor for 54V output model. Scope measurement should be made by using a BNC socket, measurement bandwidth is 0-20 MHz. Position the load between 50 mm and 75 mm from the DC-DC Converter.

Technical Notes

Remote On/Off

Positive logic remote on/off turns the module on during a logic high voltage on the remote on/off pin, and off during a logic low. To turn the power module on and off, the user must supply a switch to control the voltage between the on/off terminal and the -Vin terminal. The switch can be an open collector or equivalent. A logic low is 0V to 1.2V. A logic high is 3.5V to 12V. The maximum sink current at the on/off terminal (Pin 2) during a logic low is -500 μ A.

Negative logic remote on/off turns the module on during a logic low voltage on the remote on/off pin, and off during a logic high. To turn the power module on and off, the user must supply a switch to control the voltage between the on/off terminal and the -Vin terminal. The switch can be an open collector or equivalent. A logic low is 0V to 1.2V. A logic high is 3.5V to 12V. The maximum source current at the on/off terminal (Pin 2) during a logic high is 500 μ A.

Overload Protection

To provide hiccup mode protection in a fault (output overload) condition, the unit is equipped with internal current limiting circuitry and can endure overload for an unlimited duration.

Overvoltage Protection

The output overvoltage clamp consists of control circuitry, which is independent of the primary regulation loop, that monitors the voltage on the output terminals. The control loop of the clamp has a higher voltage set point than the primary loop. This provides a redundant voltage control that reduces the risk of output overvoltage. The OVP level can be found in the output data.

Output Ripple Reduction

A good quality low ESR capacitor placed as close as practicable across the load will give the best ripple and noise performance. To reduce output ripple, it is recommended to use 4.7 μ F capacitors at the output.

Maximum Capacitive Load

The MRZI150 series has limitation of maximum connected capacitance at the output. The power module may be operated in current limiting mode during start-up, affecting the ramp-up and the startup time. The maximum capacitance can be found in the data sheet.

Thermal Considerations

Many conditions affect the thermal performance of the power module, such as orientation, airflow over the module and board spacing. To avoid exceeding the maximum temperature rating of the components inside the power module, the baseplate temperature must be kept below 105°C. The derating curves are determined from measurements obtained in a test setup.
