

#### Instruction for the use of the LED power supply

### Model:SNP45-24VF-1

### **Applications**

The LED power supply SNP45-24VF-1 is exclusively designed for the Light Emitting Diode (LED) lamps used in indoors. It is a switch mode power supply with 24VDC constant output voltage.

An electronic protection circuit switches off the power supply in case of short circuit or overload in the secondary circuit, overheat as well as open circuit. After the removing of the faults, the LED power supply is resetting automatically for operation again. operation again

# Important information for the installation

The unit conforms to the directive 2014/30/EU for the electromagnetic compatibility and the low voltage directive 2014/35/EU.

- The LED power supply can only be used with the LED lamps.

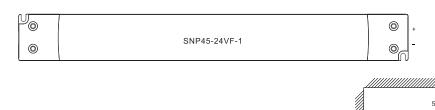

- The loads indicated on the power supply must neither exceed nor below the following values: SNP45-24VF-1: 0-45W
- Connect the LED lamps to the LED power supply with correct polarity according to the schematic drawing.
- The maximum length of the output cable to the LED lamps should not exceed 2m in order to meet the EMC standard.
- If the LED power supply is used for purposes other than originally intended or it is connected in the wrong way, no liability can be taken over for possible damages.

## **Specifications:**

200-240V +/-10% 50/60Hz Input voltage:

<0.30A 24V+/-5% Input current: Output voltage:

Output voltage: 24V+/-5%
Rated power: 45W
Protection degree: IP20
Ambient temperature ta: Max.45 °C
Case temperature tc: Max. 80 °C
Primary cable: H03VVH2-F 2x0 75mm²
Secondary cable: H03VVH2-F 2x0.75mm²

Mounting Location Dimension

50mm
