

Retail Display

Convenient Touch Display Combined with Stylish Design

Wide Variety of Sizes and Touch Options to Help Retailers Increase Operational Efficiency

Display attributes such as high-resolution, wide viewing angle, narrow bezel, thin and lightweight, and energy saving are suitable for POS systems and smart shelves. Retailers can utilize these to update pricing and product information in real-time more efficiently. Touch panels adopting direct bonding technology offer advantages such as high sensitivity, lightweight, ease of use and visibility under strong light, creating a more diversified interactive experience for retailers and consumers.

Integrated Touch Display for More Intuitive and Convenient Operation

A variety of touch solutions including out-cell, oTP and in-cell are available along with one-stop service to meet the requirements of every retail scenario.

Touch panels with direct bonding technology offer advantages such as high sensitivity, lightweight, ease of use and visibility under strong light.
