SprintIR-6S

- High-Speed CO₂ Sensor
- Up to 20 measurements per second
- Patented solid-state LED technology
- Fast response time

About the SprintIR[®]-6S

The SprintIR[®]-6S is part of a range of CO₂ sensors designed to deliver unprecedented high-speed measurement capability.

The SprintIR[®]-6S will take up to 20 readings per second, making it ideal for applications that require individual measurements at high repetition rates or where the CO₂ concentration is changing rapidly.

The SprintIR[®]-6S is fitted with a standard flow-through adaptor so the CO₂ gas can be passed over the optical sensor at high speed. Other customised adaptors are also possible depending on the installation requirements.

The SprintIR[®]-6S uses patented NDIR solid-state LED optical technology enabling the sensor to respond to rapidly changing CO₂ without compromising parametric performance.
