Two color temperature: 3030, 2835

Two color temperature: 3535, CSP (1010)

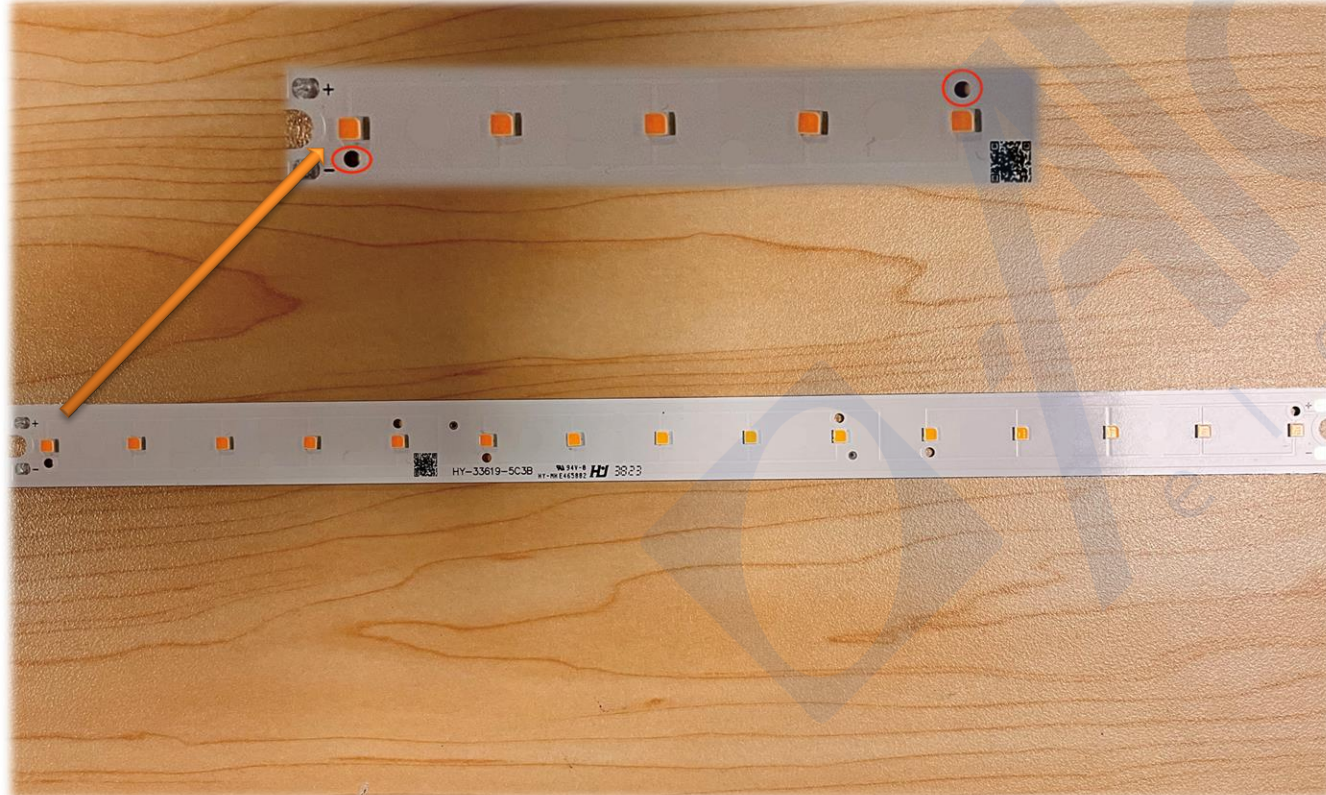

## Structural Design Recommendations

### -Screwless Mounting

1. Guide groove is made on the tube-housing, through the **positioning holes** to **snap down** after **aligning the position**, the assembly is very simple.

2.PCB **does not need to be fixed with screws**, through the tube-housing at both ends of the plug to the left and right positioning, the assembling process does not need to screw, eliminating labor costs.

**top  
recommendation**

## Refer to HercuLux recommended structure design

### -Screw mounting

1. The assembly method is unchanged, still make guide groove on the tube-housing, **align the position through the positioning holes and then snap it with downward pressure**, the assembly is very simple.

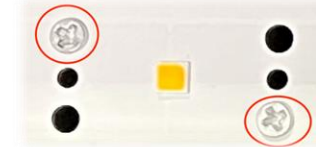

2. If you think it will be unsafe without screws, we also provide two assembly methods.

(as shown in the two sets of pictures on the right)

## Not applying HercuLux recommended structural design -Screw mounting

1. We have designed a **white holder** for our customers.
2. Similarly we have made it easy to snap on the white holder with the help of the **four clips** on the lens.
3. Meanwhile, the white holder also provides two kinds of screws for fixing.

(As shown in the two pictures on the right)
