DIGI

# **Digi Connect EZ 4 with PoE**

Click-to-connect | Modern, secure serial connectivity with Power over Ethernet (PoE) that boots in seconds, configures in minutes and runs for years

LifeCycle

Assurance

Most companies are not replacing their equipment — they are updating the way they talk to it. Digi Connect® EZ modernizes operational infrastructure with expanded network connectivity and functionality for today's applications. It is designed to meet the demands of a wide range of critical serial applications including connecting to automation, robotics control, centralized device management, data acquisition and point-of-sale equipment.

For the machine-to-machine serial customer who demands high levels of security, data consistency, and ease of use, Digi Connect EZ 4 with PoE offers a state-of-the-art communication device, with software-selectable RS-232/422/485 communication, Wi-Fi and optional LTE. Its PoE capability enhances installation flexibility, allowing seamless integration into any operational environment. It takes only a few minutes to configure with intelligent, use casebased options so that you can quickly install without having to modify your equipment or applications.

Digi simplifies key security requirements for critical infrastructure and distributed systems with enhanced access control, management and configuration capabilities. Digi Connect EZ and built-in Digi TrustFence° give your security and operations teams peace of mind against evolving threats with encrypted connections, centralized authentication, VPN support and scalable security updates.

Digi Connect EZ supports the widest range of industry standard and device-specific protocols using serial tunneling, TCP/UDP connections or Digi's patented RealPort® COM port redirector for remote native COM port access. A built-in Python environment enables application development and customization at the device level, including event-based programmability, data conversion and full control of device connections.

## Key features, benefits and applications

• Enhanced connectivity: four MEI 232/422/485 serial ports enable robust M2M data communication across multiple devices efficiently

In many winds and

- PoE: can be powered through an Ethernet cable from a compliant switch or power injector, allowing for flexible placement near connected equipment without the need for additional power sources
- Digi Accelerated Linux (DAL): ensures a consistent, secure and easyto-deploy solution that facilitates longevity and manageability across various applications
- Wi-Fi support: capable of functioning as both a client and server, enhancing versatility in network configurations
- Dual power options via 802.3af PoE or standard Digi power adapter provide installation flexibility and reduce equipment clutter
- · Optional cellular module for continuous remote connectivity
- Designed for performance in varied environments and temperatures
- Easy setup and mass configuration with Digi Navigator<sup>™</sup> and Digi Remote Manager®
- 1-year LifeCycle Assurance with 24x7 Expert Support and Digi **Remote Manager Premier included**

|   |

Technical Support The support plan provides 24 x 7 x 365 tier 1 support with four-hour SLA for device and network troubleshooting to ensure your team can resolve issues quickly. Warranty Enjoy peace of mind with Digi's best-in-class warranty, covering your device for 5 years. Our technology transition support ensures that you can maximize your technology investment and mitigate risks effectively.

## Digi Remote Manager

**Digi Remote Manager** (Digi RM) is a proven technology platform that brings networks to the next level, allowing networks — and the people who manage them — to work smarter. Digi RM transforms a multitude of dispersed IoT devices into a dynamic, intelligent network. It's easy to deploy, monitor and diagnose thousands of mission-critical devices from a single point of command on a desktop, tablet or phone. All the while, software-defined security diligently safeguards your entire Digi ecosystem.

Learn more at digi.com/digi-remote-manager.

## Digi RM Capabilities

- Activate, monitor and diagnose your mission-critical devices through a single portal
- Schedule key operations including firmware updates and file management on a single device or on a group of devices, keeping your network functionality up-todate and maintaining compliance standards
- Manage edge devices out-of-band via console terminal access
- Monitor equipment health and connectivity across deployments of any size
- Create detailed reports and enable real-time alerts for specified conditions
- Integrate device data through open APIs to gain deeper insights and control with third-party applications
- Report and alert on performance statistics, including connection history, signal quality, latency, data usage and packet loss

#### **Digi RM Infrastructure and security**

- Hosted in a commercial-grade cloud server environment that meets SOC 1°, SOC 2° and SOC 3° standards
- Superior availability, operating at 99.9% or greater uptime
- Open APIs available to support application development
- Comprehensive security controls in place to protect your data
- Member of the Center for Internet Security<sup>®</sup> (CIS<sup>®</sup>)
- Enables compliance with security frameworks like ISO27002, HIPAA, NIST and more
- Earned Skyhigh's CloudTrust<sup>™</sup> Program highest rating of Enterprise-Ready

## Digi Containers – Value-Added Service

#### Digi Remote Manager enables deployment of custom applications via containers

**Digi Containers** simplify and centralize the process of building, deploying and running custom applications on devices managed with **Digi Remote Manager** as the central portal. Containers with custom programs or Python applications can be loaded via Digi RM on any device running the **Digi Accelerated Linux** operating system (DAL OS).

As an add-on service to Digi Remote Manager, Digi Containers are a powerful capability implemented via Lightweight Linux Containers (LXC). LXC tools enable developers to package up a custom application, with its dependencies and configuration, into a lightweight, portable bundle that shares only the running kernel with the host device.

\*Digi Containers are available as a value-added service with Digi Remote Manager.

## Digi Navigator

**Digi Navigator** gives users the ability to discover and configure Digi Connect EZ in minutes. The tool is what makes Digi Connect EZ easy. It allows you to spend your time where it matters most by taking away the hassle of finding devices on a network, configuring the IP address, defining serial ports and connected devices, setting up Digi RealPort and managing passwords.

## **Digi Navigator Features**

- Find and connect to devices on a LAN
- Guide IP address configuration
- Configure Digi Connect EZ for use with Digi RealPort
- Quickly define serial ports and devices associated with ports
- Access the Digi Connect EZ web and command line interface
- Manage passwords easily

## **Digi RealPort**

Digi's patented RealPort software provides serial connectivity over IP networks, no matter where the devices reside.

Digi RealPort is unique among COM port redirectors. It is the only implementation that allows multiple connections to multiple ports over a single TCP/IP connection instead of a separate TCP/IP connection for each serial port. This helps manage network traffic and reduce congestion.

Digi RealPort is installed on the application host; whether it be local, remote, physical, virtual or in the cloud. This allows applications to communicate with devices across a network as if the devices were directly attached to the computer, allowing device connectivity from anywhere on your network.

RealPort also provides end-to-end encryption and full hardware flow control, as well as optimizations for packetization, latency and throughput.

## Digi TrustFence

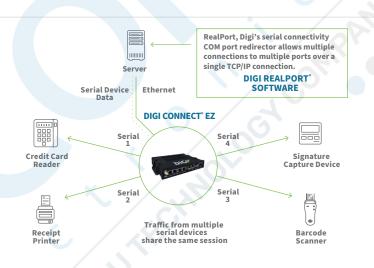

**Digi TrustFence** is a device security framework that simplifies the process of securing connected devices.

### Built-In Security. Delivered.

Designed for mission-critical applications, Digi TrustFence enables users to easily integrate device security, device identity, and data privacy capabilities into product design. Digi TrustFence security for IoT devices is designed to grow and adapt with new and evolving threats.

#### Learn more at digi.com/trustfence.

## **Digi TrustFence Features**

#### Secure Boot

- Programs and code running on the device are validated to be from an approved source or manufacturer.

#### **Protected Hardware Ports**

 Internal and external I/O ports are hardened and access-controlled to prevent unwanted local intrusion.

#### Authentication

 Provides data authentication and device identity management options and ensures that products are not shipped with default user and password settings.

#### Secure Connections

 These connections utilize the latest encryption protocols for data in motion and over-the-air (OTA) transmissions to ensure the integrity of data flowing across a network.

#### **Ongoing Monitoring and Support**

 Provides ongoing threat measurement and monitoring services and performs external security audits.
