

EcoDesign-certified Dot Free LED Strips

The Necto Group is proud to shed some light on its first **EcoDesign-certified Dot Free LED Strips**, which have been designed to perfectly integrate and decorate both indoor and outdoor environments **in an environmentally and humankind-friendly manner**.

The new EcoDesign Dot Free LED strips boast **2 different emission types** which offer a **uniform light beam** (without any dark areas or bright spots), **high yield and low consumption**.

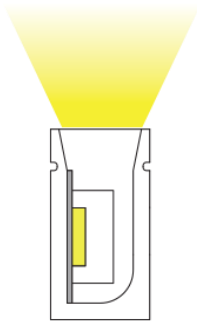

Main advantages:

- **Water and UV-resistant**
- **Easy installation** with brackets and screws
- Flexible and **cutting points positioned every 5 cm**
- **Low power consumption**
- Maximum **bend $\geq \varnothing 130$ mm**
- Ultra-bright with **140 LED/m**
- Full-length **uniform brightness (up to 25 m**

in a single reel)
